

# MATERIAL AVAILABILITY

We work with a wide variety of materials, some of our options for metal production include the following raw resources:

**1.- Zamak Alloy** / quality in high resistance engraving, doesn't rust, injection mold gives flexibility in model and design.

**2.- Steel** / low cost and lightweight.

**3.- Brass** / high durability, lightweight and resistant to corrosion.

**4.- Stainless Steel** / Lightweight, low cost , extreme resistance to corrosion.

**This material does not support the following finishes:** Brass, Gold, Rose Gold, Hanging colors, Electrophoresis and Brushed colors.
